## **DETAILED ACTION**

### ***Response to Amendment***

The new matter rejection has been withdrawn however, applicant is recommended to provide proper antecedent basis in the specification since support is only in terms of ribbed and notched.

Claims 1-4,12-15,17-23,25 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support for the measurable elasticity of the inflatable dilation bladder as originally filed.

### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: There is no antecedent basis support for the measurable elasticity .

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3763

Claims 1,12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 12 are vague and indefinite because "the second internal lumen" lacks proper antecedent basis. Applicant is suggested to replace "the" with "a".

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 20-23,25 are rejected under 35 U.S.C. 102(b) as being anticipated by Crocker et al. ( U.S. Patent No. 5,295,962).

Crocker et al. teach a system comprising a catheter, a source of fluid, a first inflatable balloon (32) having a measurable elasticity, and a dilatation bladder (30) having a measurable elasticity wherein the elasticity of the first balloon is greater than the dilatation bladder. Crocker et al. disclose the first balloon to be made of an elastic material such as latex located within the first balloon ( 32). See col. 7, lines 16-18. Further, Crocker et al. teach the dilatation bladder to be of a relatively non-elastic material. ( see col. 6, lines 48-53.) and that the application of the device is to dilate a stenotic region of a body lumen as desired. ( col. 6, lines 67-col. 7, line 2. )

***Response to Arguments***

Applicant's arguments with respect to claims 20-23,25 have been considered but are moot in view of the new ground(s) of rejection.
